## THE EFFICIENT AND SAFE CHOICE TO PROTECT MEDIUM VOLTAGE MOTORS

WEG introduces the new MVW3000 Medium Voltage Variable Speed Drive. With an easy-to-use HMI, which follows the same programming concept used by the LV line, the MVW3000 is perfect for a wide range of industrial applications that require speed variation, such as compressors, pumps, fans, conveyor belts and mills.

For new installations or retrofits, the MVW3000 is an efficient and robust solution to control the speed and streamline the process, reducing energy consumption and maintenance costs.

MVW3000 is a Voltage Source Inverter (VSI) based on the multi-level Cascaded H-Bridge (CHB) topology.

The almost sinusoidal output waveforms produced by the drive allow the use of this VSD with new or existing synchronous and induction motors without demanding especial insulation.

EFFICIENCY

RELIABILITY

SAFETY

## Features

- Motor voltage: 1.15 kV to 13.8 kV
- Motor current: up to 1,140 A<sup>1)</sup>
- Input voltage: 1.15 kV...13.8 kV
- High-efficiency air cooling
- User-friendly interface
- Arc detector system on transformer and cells cabinet as standard
- Low harmonic content, according to IEEE 519, IEC 61800-3 and G5/4-1
- Fully integrated solution
- High input power factor (> 0.95)
- Easy maintenance
- Power cells with long life plastic film capacitors
- Output waveform close to a sine wave

Note: 1) Up to 600 A for motor voltage above 6.9 kV.

It includes all the parts of a medium voltage speed variation system in a single and compact cabinet.

### Incoming Protection

- Three-phase switch disconnector with fuses and vacuum contactor - for input voltage up to 6.9 kV
- Mechanical interlock to prevent access to the MV compartment with the switch in the ON position
- Cable input through the bottom or top

### Phase-Shifting Transformer

- With lightning arrester on the high-voltage side
- Impedance matching of the windings on the secondary winding to optimize the harmonics and reduce losses on the line side
- Winding temperature monitor (Pt-100 on the windings) with up to eight channels

Note: 1) You can use the existing cubicle or one separate from the inverter. The incoming protection is an optional item. Depending on the rated power, the switchgear can be positioned in the transformer enclosure.

## Features

Power cells developed with WEG proven technology, over thirty years of experience with AC drives.

Power cells

Control

Withdrawable power cells. Clamp connection makes installation and maintenance fast and easy.

Optionally, cells can be provided with bypass function. In case of problems, the faulty cell will be removed from the circuit enabling the operation to continue. This is performed automatically by the drive.

High availability with N+1 redundancy, rated motor voltage even with a faulty power cell per phase.

### Mechanical Characteristics

- Small footprint
- IP21, IP41 and IP42 cabinet
- Mechanical interlocking system for all compartments
- Top/bottom line cable entry
- Bottom motor cable entry
- Efficient air-cooling system with optional redundant fans

### Control Column

- 10" touch screen HMI
- Indoor cabinet lights
- Fibre optic for noise immunity and galvanic isolation
- Conformal coating on PCBs as standard

## WEG Programming Suite (WPS)

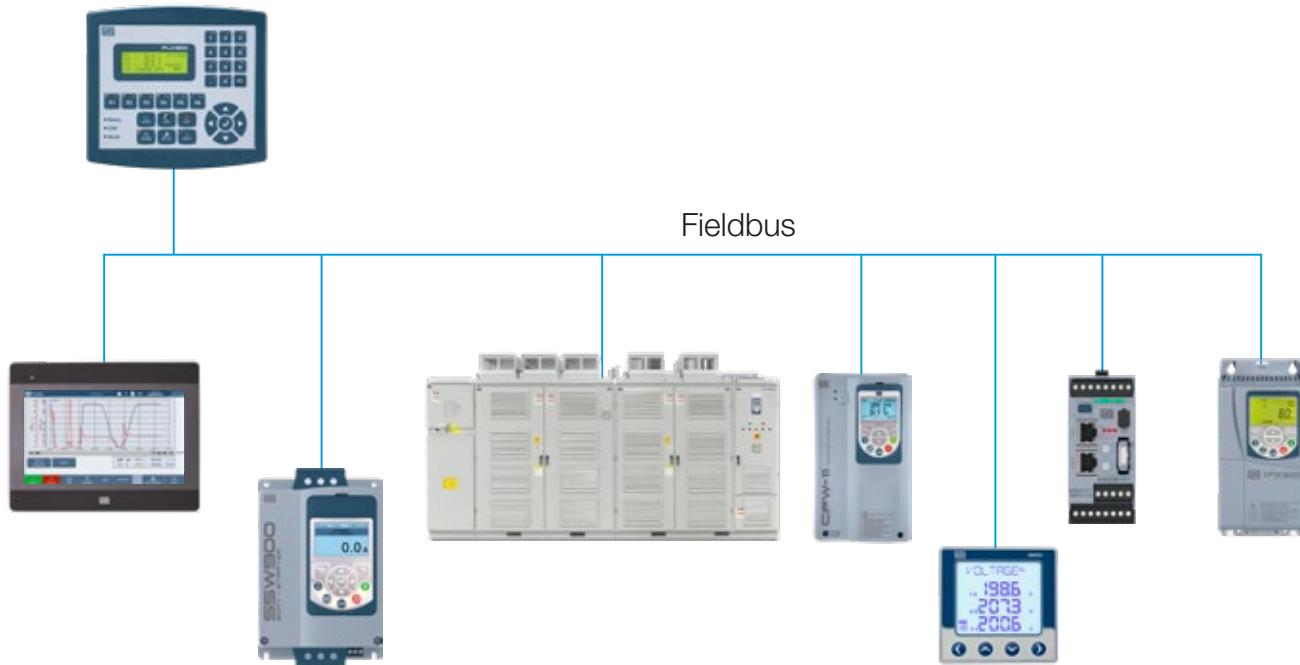

Freeware software (available at WEG website) for configuration, monitoring and diagnostic of MVW3000.

- Runs on MS Windows environment
- RS232 or RS485 serial communication
- Online and offline programming
- Graphical monitoring of drive parameters

## Fieldbus Communication

MVW3000 supports several industrial network protocols, such as Modbus-RTU, DeviceNet, Profibus, CANopen and EtherNet/IP. Others fieldbusses are available under request.

## User-friendly HMI

A door mounted 10-inch touch screen HMI offers great flexibility to the operator allowing easy access to user process data in real-time. Intuitive operation makes equipment parameterization, status reading and alarm/fault logging simple tasks.

It also supports several languages, multiple protection levels against unauthorized access, graphic and plotting functions.

Great flexibility  
to the operator

Intuitive  
operation

Support to several  
languages

Graphic and  
plotting functions

Multiple levels for  
protection against  
unauthorized access

## Testing Facilities

Every equipment manufactured is tested in our labs. This guarantees the performance and saves time during commissioning and start-up.

The tests of WEG MV VSD will be conducted in accordance with the following standards: IEC 60146-1, 61800-3, 61800-4 and 61800-5.

- Routine tests: Visual Inspection, insulation, dielectric voltage-withstand, light load, checking of auxiliary devices, checking the control equipment properties and checking the protective devices.
- Type tests: paint plan, rated load, temperature rise and efficiency / power losses.
- Especial tests: power factor, overload / overcurrent capability, harmonic distortion and ground fault test.

Routine tests, type tests and combined/string tests (VSD + Motor) can be performed in the same manufacturing plant. Please consult WEG for further information.

WEG Laboratories – Load tests in our facilities

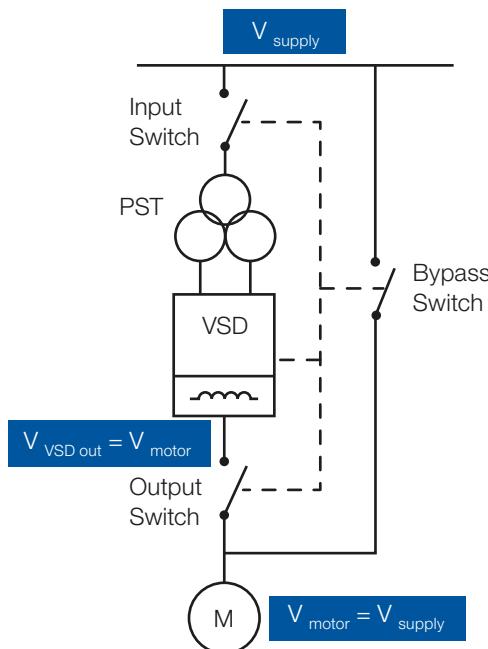

Combined test (MV Incoming Switchgear + Phase-shifting Transformer + MV VSD + MV Motor).

## System Customised Solutions

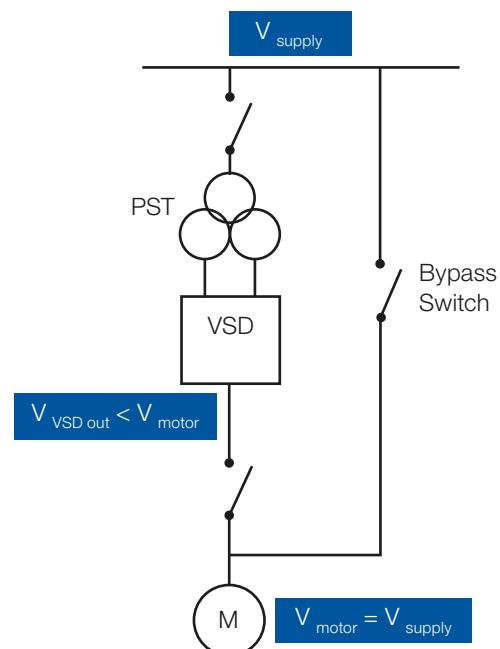

### Full Voltage Starting and Synchronous Bypass

If speed variation is not required all the time, this arrangement can be used. With this topology it is possible to start and bypass several motors to the grid.

### Reduced Voltage Starting and Standard Bypass

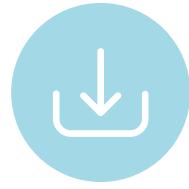

For those applications where only motor start-up is required, a VSD with lower rated voltage can be used.

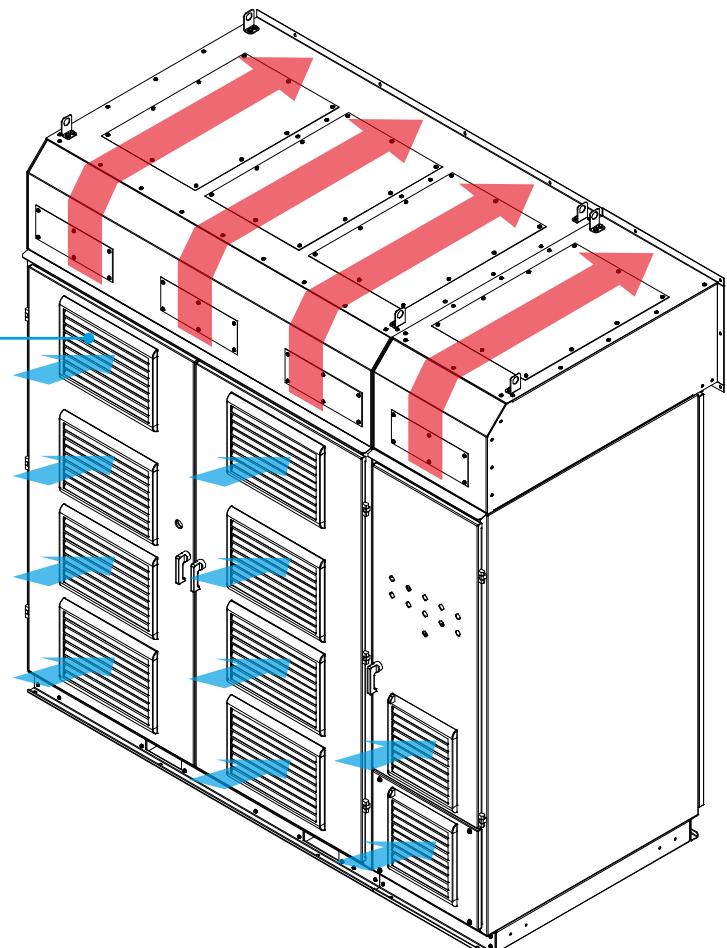

Air-duct channel to exhaust hot air to the outside of electrical room (no air-conditioning required)

Output earth switch

Standalone Input Switchgear

Note: 1) Normal Duty (ND) overload capacity: 115% for 60 seconds every 10 minutes.

Motor power is for reference only and it is based on 4-pole motor with 0.87 power factor and 97% efficiency at full load.

The ratings are valid for 40 °C ambient temperature and up to 1000 masl.

Specifications subject to change without notice.

Note: 1) Normal Duty (ND) overload capacity: 115% for 60 seconds every 10 minutes.

Motor power is for reference only and it is based on 4-pole motor with 0.87 power factor and 97% efficiency at full load.

The ratings are valid for 40 °C ambient temperature and up to 1000 masl.

Specifications subject to change without notice.

MVW3000 A0600 V138 TxA 150	600	16,215	12,100	12	72	14500 x 2750 x 1620

Note: 1) Normal Duty (ND) overload capacity: 115% for 60 seconds every 10 minutes.

Motor power is for reference only and it is based on 4-pole motor with 0.87 power factor and 97% efficiency at full load.

The ratings are valid for 40 °C ambient temperature and up to 1000 masl.

Specifications subject to change without notice.

## Technical Data

Power supply	Input and output voltages	1,150 to 13,800 V (±10%, -20% with output power derating)	
	Frequency	50 or 60 Hz (specify according to requirement) ±3%	
	Voltage unbalance between phases	<3%	
	Cos Φ	>0.95	
	Oversupply category	Category III	
Auxiliary power supply	Voltages	Three-phase: 220, 380, 400, 415, 440, 460 or 480 V	
	Frequency	50 or 60 Hz (±3%)	
	Voltage unbalance between phases	<3%	
Degree of protection	Standard	IP21(IP41 and IP42 optional)	
Environment conditions	Temperature	0 to 40 °C (up to 50 °C with output current derating of 2.5% / °C)	
	Humidity	5 to 90% non-condensing	
	Altitude	0 to 1,000 m (up to 4,000 m with derating of 10% / 1,000 m)	
	Pollution grade	2	
Finishing	Color	RAL 7035	
Control	Microprocessor	32 bits	
	Control method	PWM sinusoidal	
	Control type	Scalar (V/f), Vector	
	Switching frequency	500 Hz	
	Frequency variation	0 to 120 Hz	
	Accepted overload	115% for 60 seconds every 10 minutes	
Performance	Efficiency (typical values)	>96.5% (aluminum windings transformer) >97.0% (copper windings transformer)	
	Speed control	V/f	Regulation: 1% of the rated speed with slip compensation Resolution: 1 rpm (reference via keypad)
		With sensor (use EBA, EBB or EBC board)	Regulation: ±0.01% of the rated speed with analog 14-bit input (EBA) ±0.01% of the rated speed with digital reference (keyboard, serial, Fieldbus, electronic potentiometer, multispeed) ±0.1% of the rated speed with analog 10-bit input
Inputs Outputs	Analog	2 programmable differential inputs (10 bits): 0 to 10 V, 0 to 20 mA or 4 to 20 mA 1 programmable two-pole input (14 bits): -10 V to +10 V, 0 to 20 mA or 4 to 20 mA 1 programmable isolated input (10 bits): 0 to 10 V, 0 to 20 mA or 4 to 20 mA 2 programmable outputs (11 bits): 0 to 10 V 2 programmable two-pole outputs (14 bits): (-10 to +10) V 2 programmable isolated outputs (11 bits): 0 to 20 mA or 4 to 20 mA	
	Digital analog relay transistor	8 programmable isolated inputs: 24 V dc 1 programmable isolated input: 24 V dc 1 programmable isolated input: 24 V dc (for thermistor-PTC of the motor) 5 programmable outputs, NO/NC contacts: 240 V ac, 1 A 2 programmable isolated outputs NO: 24 V dc, 50 mA	
Communication	Serial interface Fieldbus networks	RS232 (point-to-point)	
		RS485, isolated, via EBA or EBB board (multipoint up to 30 inverters)	
		Modbus-RTU (incorporated software) via RS485 serial interface	
		Profibus-DP ou DeviceNet via kits adicionais	
		EtherNet and PROFINET	
Compliance / Standards	Electromagnetic compatibility	EMC directive 89 / 336 / EEC - industrial environment	
		EN 61800-3 Standard (EMC - emission and immunity)	
	CEI - IEC 61800	Adjustable Speed Electrical Power Drive System	
		Part 4 - General Requirements	
		Part 5 - Safety Requirements	

# Global presence is essential, as much as understanding your needs.

## Global Presence

With more than 30.000 employees worldwide, WEG is one of the largest electric motors, electronic equipments and systems manufacturers. We are constantly expanding our portfolio of products and services with expertise and market knowledge. We create integrated and customized solutions ranging from innovative products to complete after-sales service.

WEG's know-how guarantees our **Medium Voltage Variable Speed Drive** is the right choice for your application and business, assuring safety, efficiency and reliability.

 **Availability** is to have a global support network

 **Partnership** is to create solutions that suit your needs

 **Competitive edge** is to unite technology and innovation

## Know More

High performance and reliable products to improve your production process.

Excellence is to provide a whole solution in industrial automation that improves our customers productivity.
